

Cognizer™ 1.1 Personal Edition for Professionals

Course code	TC-5005
Duration	Full day
Course type	Instructor (minimum of 2 attendees, maximum of 10 attendees)
Location	Customer site
Cost per attendee	On application

What you will learn

You will learn how to install and configure Cognizer. You will learn how to use every feature of Cognizer in detail. Brief overviews of how to design cognitive protocols and how to analyze the results are also presented (for more detailed training courses see; TC-5002: How to Design and Implement a Cognitive Protocol and TC-5003: How to Analyze and Interpret Cognitive Maps).

Who should attend?

Investigators who wish to use Cognizer to collect and analyze cause maps.
Designers and decision makers who require an in-depth detailed understanding of Cognizer.
Computer professionals required to install and support Cognizer.

Prerequisites

A basic understanding of cognitive mapping techniques is useful but not essential.
Familiarity with introductory statistical concepts such as basic descriptive and inferential statistics is useful but not essential.
A basic competence with using the Microsoft Windows interface is required.

Course content

Unit 01: Introduction
Unit 02: Installing Cognizer
Unit 03: How to start, stop and get help
Unit 04: A tour of the user interface
Unit 05: Inside Cognizer
Unit 06: Overview of cognitive protocol design
Unit 07: Projects
Unit 08: Researchers
Unit 09: Participants
Unit 10: Constructs
Unit 11: Construct Sets
Unit 12: Construct Transforms
Unit 13: Overview of cause map statistics
Unit 14: Cause Maps
Unit 15: Cause Map Groups
Unit 16: Printing and sharing data
